

Artist Proposal

We were inspired by Taylor Swift's music and lyrics, and have created a series of lyrical pieces that capture the emotion, energy, and storytelling of her music, with the power of machine learning and language modelling.

Each piece in the exhibition is a reflection of characteristics from Taylor Swift's songs. The lyrics of each her songs have been analyzed and learnt by our model, to generalize and create unique new lyrics, impersonating Taylor herself.

Using N-Gram language model, RNN-LSTM and a state-of-the-art GPT-2 Transformers, we have analyzed Taylor's lyrics and music to generate new, original song lyrics that capture the essence of her music. Each piece in the exhibition features lyrics generated by the AI model, accompanied by visual art that reflects the mood and themes of the music.

One of the highlights of the exhibition is a piece inspired by Taylor's hit song "Love Story". The AI model has generated a new set of lyrics that capture the romance and drama of the original song, while adding a fresh, unexpected twist.

Overall, this exhibition is a testament to the power of technology to create new forms of art and creativity. By harnessing the power of AI, we have generated new song lyrics that pay homage to the music of Taylor Swift while pushing the boundaries of what is possible. We invite you to explore the exhibition and discover the exciting possibilities of AI-generated art.
